

## ON DEMAND GENERAL PRINCIPLES REVIEW LECTURE (PRE RECORDED)

### 1. Certified Professional In Erosion & Sediment Control (CPESC-SI)

### 1. Certified Erosion, Sediment & Storm Water Inspector (CESSWI-SI)

**CPESC** – Certified Professional in Erosion and Sediment Control. This program was created to provide professional credentials for individuals working to **manage erosion and sediment control issues for land disturbing activities.**

**CESSWI** - Certified Erosion, Sediment and Storm Water Inspector. This program was created to provide professional credentials for individuals who have proven they are **technically qualified to provide consistent and competent site inspections for compliance with appropriate local, state wide, and national laws and regulations.**

**CPSWQ** – Certified Professional in Storm Water Quality. This program was created to provide professional credentials for individuals working to **manage erosion, sediment control and storm water issues for land disturbing activities.**

### Benefits of Certification

- Demonstrate proficiency in the erosion and sediment control field
- Enhances your technical and professional credibility
- Satisfies the qualified-person requirement in local and state programs
- Increases personal value, recognition and marketability
- Encourages greater commitment and personal career growth
